Applicant: Du et al.  
Appl. No.: 10/730,476  
Filing Date: December 8, 2003  
Title: COMPOSITIONS AND METHODS FOR CLEAVING IAP  
Attorney Docket No.: 65015  
Pub. No.: US 2004/0171105 A1  
Pub. Date: September 2, 2004

This is a decision on the request for a corrected patent application publication under 37 CFR 1.221(b), filed on September 29, 2004, for the above-identified application.

The request is granted.

Applicants have been advised to file applications having cleaner text with sufficient clarity and contrast to permit reproduction, such as electronic reproduction by digital imaging and optical character recognition, which will avoid errors in the patent application publication process. See 37 CFR 1.52.

Some of the text in the application is small, which makes it blurry and not clear, which also makes it difficult to read and to electronically reproduce by digital imaging and optical character recognition.

Inquiries relating to this matter may be directed to Mark Polutta at (571) 272-7709 (voice).
